ABOUT ME

Full-Stack Developer and Applied Information Technology graduate based in Gaza, Palestine. I develop bilingual, responsive products using React, Next.js, TypeScript, Node.js, REST APIs, and relational databases. My graduation project, SmartStay AI Palestine, is a three-role accommodation marketplace with AI-assisted planning, secure sessions, and database-level booking-conflict protection. Available immediately for remote and international Full-Stack Developer roles.

WORK EXPERIENCE

Web Development Intern - 180 Training Hours

Electricity Company, Khan Younis | Aug 2023 - Sep 2023

Contributed to an internal electricity-company web system as part of a development team, working with database-backed operational information.

- Implemented responsive interface components and organized application data for reliable day-to-day use.
- Participated in functional testing, issue resolution, and team task coordination during the 180-hour placement.

EDUCATION AND TRAINING

Bachelor's Degree in Applied Information Technology

Al-Aqsa University - College of Computer & Information Technology | 2025

Final grade: **81.7%**.

Graduation Project - SmartStay AI Palestine

Individual Full-Stack Project | 2025

Designed and developed a bilingual marketplace for hotels, chalets, villas, resorts, and local stays across Palestine.

- Implemented customer, property-owner, and administrator workflows with nine relational database tables.
- Added AI-assisted recommendations, secure account sessions, property moderation, R2 image uploads, and database-level double-booking protection.
